

Update for Patients who attend the AntiCoagulation service in NCC-January 2021

For patients on Anti Coagulation therapy:

As we have entered the third wave of this global pandemic, we would like to thank you for your continued support and patience during this healthcare emergency.

- All routine procedures have been cancelled across the adult healthcare system until further notice.
- The DOAC clinics have been put on hold for now.
- The Warfarin Clinics continue in OPD as normal.
- Patient consultations will continue either by telephone or video call. Face to face consultations will be arranged in situations where the consultant deems it necessary.
- We do not have any information on the rollout of the COVID-19 vaccination to those in the community at present, however, if you go to the 'COVID-19 Vaccination' heading in the 'Patient Information' tab on the National Coagulation Centre webpage on www.stjames.ie you can access instruction for your healthcare provider on how to prepare you for COVID-19 vaccination.
Please ensure you look at the vaccination instruction for the patients on anti-coagulation medication.

Our contact details remain unchanged:

For patients who attend the Anticoagulation Service

For Non Clinical Queries
